

Fit 500 Dental Plans

The perfect fit for any budget

SDC's **Fit 500** dental plans are designed to fit any budget, providing a lower-cost option to employees who don't need or can't afford comprehensive coverage. Because **Fit 500** monthly premiums are lower than traditional dental plans, they are a great solution for keeping dental in as a stand-alone benefit when funds are limited. These plans can also be offered to employees as an affordable alternative to a richer dental plan already in place.

Each **Fit 500** option covers a targeted set of dental services:

Prevent Fit covers services such as cleanings to help with preventive care

Essential Fit covers services such as cleanings and fillings to help with essential care

Basic Fit covers a combination of services to help with preventive and restorative care (*a great option for families!*)

Major Fit covers extensive treatments such as root canals and crowns to help with more costly procedures

Every **Fit 500** dental plan comes with a **\$500 contract maximum benefit** per member and **no deductible**. While the level of coverage is the same in or out of network, members can maximize their benefits by selecting a dentist from SDC's national network with over half a million access points across the country.

Affordable coverage for the dental services that matter most to your group...
SDC's **Fit 500** dental plans are a perfect fit!
